Axiom daily honesty report — 2026-05-04

Operator-visible signals — divergence, calibrator drift, tail-risk concentration, gate trips, and the latest investor deck. See runbook §21 for what each red signal means.

1. Shadow-vs-live divergence (last 7d, |Brier delta| per league)

League	|Δ|	Brier (live)	n live	Brier (shadow)	n shadow
NBA	0.1600	0.0000	50	0.1600	50

Insufficient samples (skipped): NHL

2. Calibrator drift status

Tone	League	Brier	Age (h)	Why
RED	NHL	0.2700	25.0	drift_status=drift_breach; brier_after=0.2700>0.25
GREEN	NBA	0.1800	1.0	ok

3. Tail-risk concentration (last 30d)

tail_max_loss	$1,234.56
total_max_loss	$9,876.54
pct_in_tail	12.5%
tone	yellow
threshold_price	0.07
source	fake

4. Risk-gate trips (last 24h)

total trips: 5

Gate	Count	Last at
tail_risk_size_clamped	4	2026-04-30T12:30:00Z
drawdown_limit	1	2026-04-30T05:00:00Z

5. Uncalibrated live trades (last 24h, raw-mode override)

0 raw-mode trades shipped — calibrator gate held.

Latest investor deck

not built yet — weekly cron will produce one on the next run.

Read the runbook §21 for what each red signal means. Generated by app.notifications.daily_honesty_report.
